As **Summer** is in full swing HPUD would like to remind each of you that there are ways to protect your household water. HPUD has a check valve on each meter from the main water system to every private service. While filling your swimming pool, or fertilizing your lawn with product you connect to your watering hose you may be contaminating your household water with chemicals. HPUD encourages you to consider purchasing a fitting for your outside faucet that is a backflow preventor.
