Newsletter

It's almost time for the kiddos to go back to school! Just in case you haven't heard when the start dates are, they are at the bottom of this newsletter. Please enjoy the next few weeks with them, as they go up so quickly! Remember our children do not always watch where they are going, so, please, watch for them while driving.

Herlong PUD would like you to know some facts about WATER. We sometimes take it for granted. What TYPES of water are there? What are some of the different sources water comes from? Where does the water from YOUR tap come from? Over the next few months we would like to answer these questions.

One of the most important things to know is the difference between POTABLE and NON-POTABLE water. POTABLE water is water that is safe for human consumption. Uses: drinking, food preparation, cooking, hygiene, and other activities that require safe, clean water; such as non-treated (backyard) swimming pool. NON-POTABLE water is for Irrigation, toilet flushing, firefighting, and other non-consumption applications. Non-potable sources include: rainwater, surface water (lakes, rivers, etc.), and recycled water that hasn't been treated. HPUD encourages their customers to keep these things in mind while traveling, camping and RVing.

The water provided by Herlong PUD is POTABLE water, is tested and meets all of the standards required by State and Federal regulations. HPUD is proud of the fact that mandatory testing show both of HPUD's wells to show "NO PFAS DETECTED". That was reported in the October 2024 newsletter.

Administrative Office Hours
Monday-Thursday 8:00am—3:00pm
Fridays 8:00 - 12:00pm

PO Box 115
447-855 Plumas Street
